What is a glow stick anyways?

After Dr. Edwin Chandross invented the glow stick by accident in the 1962 by combining oxalic acid (chloride) and hydrogen peroxide, there were many uses for glow sticks. The “crack” you hear when you snap the glow stick is the thin glass tube inside the plastic breaking to release the glow-y chemicals. It didn’t start out as an essential piece at glow parties—at first! It helped the military see at night without power, stored in cars and first aid kits for emergencies, trick-or-treating, police officers direct during the night, miners, crossing guards in the early morning, and camping. The best part is that it didn’t give off any heat, water-proof, and don’t use any electricity! Some glow sticks last 24 hours.

How did they become popular and what is a glow party?

Glow sticks became popular in the 80’s, which is known as the NEON color era. Their neon illuminating effect comes after the separate casings are broken, phenyl oxalate and fluorescent, neon colored dye solution mix with hydrogen peroxide. The first official sale of glow sticks were to circuses. It also became popular to use them in camping to tie a string on it and hang it from a tree.

When outdoor music venues and concerts started rising in the 80s, glow sticks were allowed in theaters because they didn’t give off heat and couldn’t catch on fire.

Concerts were the beginning of “glow parties.” Often, dancing parties would happen once it was nighttime and you can see their dance moves due to the glow sticks. The first glow necklace was a piece ribbon or twine around the glow stick. Later on in the 90’s, thin glow necklaces and bracelets were invented for a less clunky way to glow.

How do black lights work and what are some uses?

If you turn on a black light bulb in a dark room, what you can see from the bulb is a purplish glow. What you cannot see is the **ultraviolet light** that the bulb is also producing.

Our eyes can see visible light in a spectrum ranging from red through orange, yellow, green, blue and violet. Above violet is ultraviolet light, which we cannot see. A black light bulb pro-

duces **UVA** light). What you see glowing under a black light are called **phosphors**. A phosphor is any substance that emits visible light in response to some sort of **radiation**. A phosphor converts the energy in the UV radiation from a black light into visible light.

Glow Party DIY Clothes

NEON Tye-Dye Shirt

white 100% cotton t-shirts
 rubber gloves
 rubber bands
 Plastic tablecloth or a large garbage bag per participant to place on your lawn
 NEON tie dye kit [found at your local craft store]
 old clothes to wear while dyeing

Make sure to cover yourself with clothes you don't mind getting dirty

There are several ways to tie-dye a piece of clothing. Start with a white piece of cotton clothing that has been washed at least once. ****CAUTION: Don't work with dyes in or around where food is prepared, or mix dyes with a container or spoon used for eating.****

Three different design ideas:

- 1) Take a dowel rod or stick and place it in the middle of a shirt. Twist the rod ever so slightly until the shirt is turned into a complete circle of swirls. Do the same to the sleeves or create another design. Rubber band the circle of the shirt and other areas you have swirled the shirt. Apply the dye as directed on the container.
- 2) Tie rubber bands in different areas of the shirt. Keep in mind the bands must be tight to ensure that the dye doesn't seep through to areas that you would like to stay white. Apply dye as directed.
- 3) Twist, turn and bind the shirt in different areas and designs. Secure the design with rubber bands. Apply dye as directed on the container.

For a variety of colors on your shirt, use the squeeze or spray bottle method. Mix your dye as directed. Saturate the area where you would like that color and continue this method with other colors. Place item in a gallon ziploc bag sealed tight for at least 24 hours. Wash garment in the washer alone in cold water until all colors run clear. Toss it in a dryer to set the colors. NOTE: Do not wash with other shirts due to the dye bleeding on other clothing.

NEON Scrunchie

2 inches wide X 22 inches long of NEON cotton or cotton blend fabric
 Sewing machine, with matching thread
 2 large safety pins
 Elastic 1/4 inch wide, about 6 inches long

Start by folding the fabric in half long way, so it looks like a long tube. Take the top part of the fabric and fold one edge over, to create a small hem, sewing it on the wrong side of the fabric. Repeat on the other end of the fabric. Trim the threads and fold it back together, with the outside of the fabric facing out. Sew down the side of the fabric, making sure each side is together as you sew down the side. Use the pressure foot as a guide for the width. Guide the pressure along the edge of the fabric.

Next place a large safety pin on the top of the fabric, only pinning one side of the fabric. Push the safety pin through the tube. Continue to push the tube through until the fabric is turned right side out. Unhook the safety pin.

Cut the elastic to go inside the scrunchie, about 6 inches. Attach the safety to one end of the elastic and another at the other end attaching it to the fabric. This way you will not lose the end of the elastic as you are pushing it through.

Covers requirements #4, 8

Glow Party DIY Clothes

Glow Party Leggings

NEON paint
 Cheap pair of black or white leggings
 Paintbrush with fluffy bristles
 Disposable bowl or plate
 Newspaper or trash bag per participant to place on your lawn
 Extra: appliqués, NEON puffy paint, stencils

Make sure to cover yourself with clothes you don't mind getting dirty

Lay the leggings on the newspaper or trash bag flat with the legs spread out, front side first. Take the NEON paint and pour some in the disposable container. Place the paintbrush in the container and splatter or flick the NEON paint over the leggings. You can do designs with stencils or NEON puffy paint as well. Let the front side dry first. Flip the leggings over when they're completely dry and repeat.

NEON Designed Shirt

White, black, or NEON colored shirt (plain, no design)
 NEON puffy paint, paint, or markers
 Stencils (various designs)
 Cardboard
 Extra: NEON sew-on letters, appliqués

Make sure to cover yourself with clothes you don't mind getting dirty

If you are sewing anything on like letters or appliqués, do this BEFORE you start painting.

Insert the cardboard piece inside the shirt. Begin designing your shirt with stencils, puffy paint, and markers. Let the front of the shirt dry completely before designing the back.

Retro Necklace

Light green glass or porcelain beads (jade is hard to find)
 Bigger light green glass or porcelain bead
 Clear jewelry string

String the beads onto the string. Round beads work the best, but if they are different shapes, that makes it more unique! Place the bigger bead in the middle for a center piece. You can alternate with gold or red beads if you like, but necklaces are traditionally all the same around. Wear with your costume or just for good luck.

Groovy Headband

Fabric covered headband
 NEON appliqués, neon feathers (if desired), stick on rhinestones in fun colors
 Hot glue gun with hot glue gun sticks
 NEON ribbon (optional)

Place the appliqués onto the headband and hot glue onto the places that you would like them on. Make sure the appliqués aren't too big that they hang off the headband. Be sure to pick smaller ones. Place the rhinestones onto the headband wherever you want them. If desired, make a bow with the ribbon and place onto the side of the headband.

Decoration Ideas

Graffiti Wall

Get black butcher paper and cover the entire wall space (or a designated area). Have the guests sign the walls with NEON or white colored markers.

Photo backdrop

Use a black sheet and splatter NEON paint all over. Allow time to dry before the party. Optional: stencil letters with NEON paint.

Easy NEON signs

Get several sheets of NEON poster board and decorate them with black markers and foam shapes. Great places to hang the signs are: refreshment table, DJ area, bathrooms, etc. You can get NEON name tags/price tags at the dollar store or office supply store to make it easier to label food.

Photo frames

Paint wooden photo frames with NEON paint and place pictures of your friends inside of them or drink/food names in them for the party. Your guests could even paint and decorate their own frames as an activity.

GLOW food display

Pick out your food display items (goblets, platters, cupcake stand) and spray paint them NEON yellow or green. Make sure you place doilies on them if you are serving food straight on top of them. Placing cups or lined cupcakes on them are fine.

Streamer central

Hang up NEON streamers. For extra, tie them around a hula hoop and place around a light or the refreshment table. They would also be cute taped around the refreshment or DJ table or as a backdrop for your photos.

Radical flowers

If you are decorating your flower, draw your design before you fold it. Fold a piece of white or NEON colored paper accordion style, starting at the shorter end of the paper. Once it is folded, staple the ends together to make a flower. Use packing tape or poster putty to adhere it to the wall or backdrop. For extra, you can make it multiple colors.

Glow beauty bar

Have a glow beauty bar for your guests! Put together some essential items to make all your guests glow, like NEON scrunchies, bows, and clips, glow body paint, extra glow necklaces and bracelets, nail stickers, name tags, simple make-up, hair paint, glow headbands, and more.

Covers requirement #5

Glow Party Invitations

Copy the below invitations out on cardstock paper in NEON colors.

You can also write the items to bring or additional information about the event. Example: "Wear White or NEON" or "Bring a glow stick."

On the left side, the words "Who:", "When:", "Where:", and "RSVP:" are stacked vertically, each enclosed in a circle. To the right of each word is a horizontal line for writing. In the bottom right corner, there is a circle with a star inside it.

A second identical rectangular invitation template, positioned below the first one. It features the same layout: a star at the top left, "Glow Party!" text, overlapping circles in the top right, and four horizontal lines for "Who:", "When:", "Where:", and "RSVP:" on the left. A star-in-circle icon is in the bottom right corner.

Glow Party Games

Hazy Hide and Seek

Glow sticks
String

This game is preferred to be outside and when it's nighttime

Gather your friends and let someone either choose to be it or appoint someone to be it, they will be the seeker. Choose a "base" for counting and to run to be safe. The base should be decorated with glow sticks on strings (preferably a tree). He/she turns around and counts to ten with their eyes closed at the "base" while the rest of the people hide. Then "It" says "Ready or Not, Here I Come" and rushes to find everyone. Everyone tries to get to base without getting tagged or else they are "It". If the person who is "It" doesn't get someone in three tries he/she gets to pick a person to be it! For extra bonus, the "It" has a glow stick.

Electric Stick (Hot Potato)

Glow stick
Music

Everybody sits in a circle, cross legged. When the music starts, people pass the glow stick around the circle to the music. When music stops, the person holding the glow stick is out! Optional, you can start a smaller circle when enough people are out.

Glow Freeze Tag or Human Glow/Blob

Glow sticks (about 2-3 different colors)

This game is preferred to be outside and when it's nighttime

Divide the people into 2-3 teams and assign them a color glow stick. The idea of the game is to tag members of the opposite color as you. They must freeze until someone from their team tags them. Alternatively, when you tag someone, you can make them part of your team color instead of freezing them.

USING WATER

Glow Water Cup Relay

Plastic cup
Water
Tonic water
Two buckets

Before the game starts, add about a cup of tonic water to the water for GLOW!

Divide your group into lines and place the buckets at the end of the field. Fill one bucket with water and leave one empty. The first person in the line has to walk or run as fast as they can with the cup on their head to the bucket and fill the cup up with water and return it back to the person next in line. The next person does the same except this person has to dump what was left in the cup into the empty bucket. Then, they have to fill the cup up with water and balance it on their head to give the next person the cup. The goal is to have as much water in your cup to place in the bucket, so you have to plan your movements wisely. The team that wins is the one that has the most in their bucket.
