The White House is where the President of the United States resides. The exterior of the White House, despite some additions and minor changes, remains much as it was in 1800. The total initial cost was \$232,372. The White House was originally constructed in 1792-1800, of James Hoban. It was reconstructed in 1815 after being burned by British soldiers during the War of 1812. It has been the home of every president of the United States since John Adams.

An early view inside the White House: The first bath tubs in the White House were portable and made of tin; water was hauled in buckets, running water wasn't piped into the White House until 1833. Candles and oil lamps were used for lighting until 1848. Fireplaces were used for heating the house until 1837, in 1853, they received hot water in the upstairs bathroom, they cooked on a open fireplace until 1801 and in 1881 the first hydraulic elevator was installed. It has 132 rooms and 55,000 square feet.

The address to the White House is :

1600 Pennsylvania Ave
